Moving Lights can be rented.

Color:

Color filters for the stage lights are considered a perishable item and all clients are required to provide all color as needed. The exceptions to this policy are as follows:

Miller Center maintains a small selection of Rosco and Lee filters. These colors are available, as stock and circumstance allow. We recognize that having Miller Center provide color can speed up the tech process, and we will do so when practical. Events using the rep plot are expected to provide all on-stage color; i.e. booms, and color-change color. The Miller Center will provide FOH color and electric.
