

Lighting

Welcome to the Stage Lighting Section of the Miller Center. Rep Lighting plot is available as a Vectorworks Spotlight File with a Lightwrite file

Control: ETC ION Xe 20
Unison Control Station for House Lights

Dimmers: 134 ETC Sensor 2.4k Dimmers
Does not include House Light Dimming

Circuit Layout:

FOH Cove has 26 circuits, numbers 1 thru 26
House Right Box Boom has 4 circuits, numbers 27 thru 30
House Right Box Boom has 4 circuits, numbers 31 thru 34

1st Electric has 24 circuits, numbers 35 thru 58
2nd Electric has 14 circuits, numbers 59 thru 72
3rd Electric has 14 circuits, numbers 73 thru 86
4th Electric has 16 circuits numbers 87 thru 102

8 Drop Boxes, 4 Stage Left and 4 Stage Right, 4 circuits in each box.
S R Drop Box # 1 circuits 115-118 S L Drop Box # 1 circuits 131-134
S R Drop Box # 2 circuits 111-114 S L Drop Box # 2 circuits 127 -130
S R Drop Box # 3 circuits 107-110 S L Drop Box # 3 circuits 123-126
S R Drop Box # 4 Circuits 103-106 S L Drop Box # 4 circuits 119-122

Notes:

Light board is in booth in the balcony. House lights are controlled from Unison panel control systems, with stations in the Control Room and down stage right. All control elements are DMX based, and as such, can be controlled from the Express console as needed, as well as from any other DMX consoles

Production table can be set up in the center of the orchestra upon request. The light board cannot be moved to the production table.

NO Non-Dim Power is available on any of the electrics or drop boxes. A dimmer will need to be parked.

Follow Spots are operated from the FOH Cove.

DMX taps are stage left on each electric, down stage right and in the FOH cove.

200-amp 3 phase 5 wire Company Switches Located Upstage Left
